

Java Lab Competition

Module	SE101.3 -OOP with Java – 25.3
Lab Sheet Number	03
Time	1 hour

Instructions

- Answer all questions.
- Write clean and readable code.
- Use proper indentation.
- Test your program with different inputs.

Questions

1. Print the following pattern using nested for loops (for n = 5):

```
*  
**  
***  
****  
*****
```

2. Write a program to input numbers continuously and calculate the sum of odd numbers only.
Stop when the user enters 0.
3. Write a program to find the largest of three numbers.
4. Multiplication Table:
Input: An integer n
Output: Print multiplication table up to 10.
5. Count Digits of a Number:
Write a program to input an integer and count how many digits it has.
6. Write a program to input an integer and print the reversed number.
7. Write a Java program that performs a simple calculation using a switch statement.

Requirements:

- Take two integers as input
- Take an operator as input (+, -, *, /)
- Perform the operation using switch
- Display the result

8. Write a program to find whether a given number is odd or even.
